## About Investment Management

The Investment Management Standard (IMS) is a collection of simple, common sense ideas and practices that help organisation to direct resources to deliver the best outcomes.

The standard has been evolving since 2004 as a response to investment practices that were increasingly complex but which failed to focus on the real need for an investment or the benefits that would be delivered. Its uses have expanded to the point that it is now a system that can support the primary investment decision-making functions of any organisation on multiple levels, from a decision about a single investment initiative to whole-of-organisation decisions that refocus the organisation's direction. For more information on how IMS can be used to aid your organisation, go to [www.dtf.vic.gov/investmentmanagement](http://www.dtf.vic.gov/investmentmanagement).

## Costs

**Note:** As part of the engagement, you might choose to do one or all workshops. Consult the facilitator and familiarise yourself with the [Investment Management Standard](#). If any prior IMS workshops have been developed on your investment, make sure you inform the facilitator.
